

Reports

There are three principle reports available

1. [Private Valuation](#)
2. [Homebuyers Survey and Valuation](#)
3. [Building Survey](#)

The surveyor carries a wide range of equipment for measuring and reporting on the property including damp meter and will examine the property in detail both internally and externally:-

- Internally - Access the loft void and any cellars where possible
- Externally - Use binoculars for a closer inspection of the chimney, roof, guttering and walls.

View any of the [Reports](#) above or [Contact us](#) for further information.
